

Submission Guidelines

Submission Guidelines for the Competition

To ensure a smooth and fair submission process, all teams are required to follow the guidelines outlined below. These rules are crucial for maintaining the integrity of the competition and ensuring that every team has an equal opportunity to showcase their work.

- Submissions open on October 7th at 7:30 PM
- Only one project submission per team is allowed during the submission rounds.
- Copying another project or committing plagiarism is strictly prohibited.
- Teams must submit their project within the specified time frame to be eligible for the e-certificates and other prizes offered by WS02.

Deadline: 17th October, 11.59 PM

Guidelines for code submission

Upload the source code to GitHub as a public open-source repository and share the GitHub repository URL.
Commit a README.md with clear instructions to execute the application

If the project is hosted in a private repository, it must be made public for 12 hours from the submission deadline.

Rename the GitHub repository according to the name specified in the PDF.

Guidelines for video submission

Create a 5 to 10-minute demonstration video, upload it as a public video on YouTube and share the video link.
You may use the below structure for the video.

- Idea (1-3 minutes)
 - Explain the key problem/innovative idea the project aims to solve
 - Explain the solution highlighting the creativity, potential impact of the project
- Demo (4-6 minutes)
 - Provide a brief technical overview of the architecture (mention any integrations, third-party services, or APIs used).
 - Explain the core features and functionalities of the solution
 - Show the working application
 - Frontend
 - Backend - Explain how Ballerina was utilized in the project
- Conclusion - (Optional) (0.5-1 minutes)

Please use the following structure when uploading the video to YouTube. Customize the provided thumbnail with relevant details.

Title :

[Team Name] | [Project Name]

Description :

We are [Team Name], and our project, [Project Name], is designed to [briefly describe the project purpose, e.g., integrate services, automate workflows, etc.]. This solution leverages Ballerina's advanced features to solve [specific problem your project addresses].

How We Used Ballerina:

We utilized Ballerina for [briefly describe how you integrated Ballerina, e.g., microservices, API integration, cloud services, etc.] to [explain how Ballerina solved or simplified the problem].

Source Code: [Link to GitHub Repository]

Documentation: [Link to detailed project documentation, if available]

#InnovateWithBallerina #Ballerinalang #WSO2 #IEEESBUOM #IEEECSUOM #TERM23/24 #Ballerina
#BallerinaProgramming [two additional tags about your project, if available]
